MOAM 2025

MALANG OBSTETRIC ANESTHESIA MEETING

Golden Tulip Hotel, Batu, 8-12 May 2025

COMPREHENSIVE APPROACHES IN OBSTETRIC ANESTHESIA ADVANCED KNOWLEDGE & INTEGRATED CARE

BACKGROUND

Dear Colleagues and Friends,

Obstetric anesthesia is a subspecialty within anesthesiology that focuses on pain management and anesthesia during pregnancy, labor, and the postpartum period. This field plays a crucial role in ensuring the safety and comfort of both the mother and the fetus throughout the childbirth process. Over the past few decades, advancements in science and technology have introduced significant innovations in obstetric anesthesia practices. A comprehensive approach that integrates advanced knowledge, clinical expertise, and multidisciplinary coordination has become increasingly essential in addressing the complex challenges of maternal care, particularly in high-risk cases.

Comprehensive management, including continuous self-education and multidisciplinary collaboration among anesthesiologists, obstetricians, and nurses, is vital for rapid decision-making, especially in emergency situations within obstetric anesthesia. Through an integrative approach, this symposium aims to foster synergy among various medical disciplines, including obstetrics, intensive care, and neonatology, to provide holistic and evidence-based maternal care.

With this in mind, Malang Obstetric Anesthesia Meeting (MOAM) proudly present MOAM 2025 with theme “Comprehensive Approaches in Obstetric Anesthesia: Advanced Knowledge & Integrated Care.” This event aspires to enhance fetomaternal outcomes and prevent complications through the latest advancements and collaborative efforts in obstetric anesthesia.
